We have had more than 133 individuals all working in different capacities to move this project along with more than 50,000 men/women hours in total since this project began slightly more than one year ago, not counting all of the work and meetings, which took place to get the project off the ground.

Efforts are attributed to:

- 29 Working Group and EBC members
- 18 ABC/BDAT members
- 26 COA members
- 2 City Councilors
- 50+ City staff supporting the process
- 3 project management team members (consultant)
- 5 architectural team members (consultant)
